

How Long Does It Take to Charge an Electric Car?

The cost to charge an electric car in the UK varies between home, work and public charging. For a typical electric car with a 60kWh battery and ~200 mile range of [Vchrgd Installer Essex](#):

- Charging at home: Costs about £15.10 for a full charge [EV Charger Installation Essex](#).
- Charging at work: Many employers will install workplace charging points and typically offer free access throughout the day.
- Charging at public locations: Public chargepoints at supermarkets or car parks are often free to use for the duration of your stay.
- Rapid charging: Rapid charging points are normally found at motorway service stations and typically cost £6.50 for a 30 min, ~90 mile charge.

Cost to charge an electric car at work

The cost of charging an electric car at work can vary between organisations with some choosing to provide free charging while others set a paid tariff.

- Some employers offer free charging as a staff incentive.
- Others opt for a time-based tariff to encourage sharing of charging stations.
- Another model is to offer free employee charging for a set period of time and a fee after this time to encourage employees to vacate charging spaces.
